## THE DIY BRIDE

COUNTRY CHIC WEDDING PLACE CARDS by XYRON DESIGNER BETH KINGSTON

..... Coordinate the paper straws and patterned papers to match any color scheme! .....

### SUPPLIES:

- several sheets 8.5" x 11" white cardstock
- assorted patterned papers in one color (this project uses yellow)
- trimmer
- paper straws
- Xyron 5" Creative Station
- hole punch
- mesh jars

### INSTRUCTIONS:

1. Use your preferred computer publishing program (i.e. Microsoft Publisher, Power Point) to arrange text for place settings. Make sure all text boxes are the same rectangular size and leave approx. 1/2" additional space on the top and bottom of each text box for hole punches (which we will do later). Adjust font color if desired.
2. Print on white cardstock.
3. Cut cardstock in to individual place settings of consistent size.
4. After cutting, measure the dimensions.
5. Add 1/2" to each dimension of place setting and cut the patterned paper to this size (for example - if the place setting is 2" x 3", cut patterned paper to 2.5" x 3.5").
6. Run place settings text side up through Xyron Creative Station. Depending on the site you may be able to run two through together - one next to the other. Remove clear film.
7. Peel place setting from backing and adhere directly in the center of patterned paper. Repeat for all place settings.
8. Punch a hole approx. 1/2" from the top and the bottom of the finished place setting.
9. Thread paper straw through place setting and place in jar(s).

5" Creative Station: The Creative Station is a slicer, maker, laminator, label and magnet maker all in one. Perfect for craft, school, home and office projects. The 5" Creative Station is ideal for creating photo stickers, photo magnets, laminated recipe cards, business cards, labels for jars and cabinets and many other projects. It retails for \$34.99.
